

Q3 (a)

The SI unit of force is the newton, written as N.

Q1

Photosynthesis is the process by which green plants convert light energy from the sun into chemical energy stored as glucose. It takes in carbon dioxide and water and releases oxygen as a by-product. The pigment

responsible for capturing the light is chlorophyll, which
is found in the chloroplasts of the leaf cells.

Q5

The chemical formula for water is H₂O.

Q9

The capital city of France is Paris, which lies on
the river Seine.
